

Engineer Grade Reflective Tape

Looking for increased awareness? Try our line of Engineer Grade Reflective Tapes. These tapes offer vibrant daytime visibility with reflective properties for nighttime use.

All tape is rated for use outdoors for a 7-year life span. Tape has an aggressive adhesive that will adhere to almost any clean, dry, smooth surface.

Hazard striped products have a protective lamination to ensure the printed stripe will not wear off. Tape comes with removable release liner.

Custom printing and conversion also available. We also offer our entire range of reflective products in large format rolls.

Conspicuity DOT-C2 Reflective Tape

Exceeds requirements of the NHTSA (49 CFR 571), and every strip carries the DOT - C2 legal certification for compliance

Modular pattern of reflective prisms allow it to be mounted in any position while maintaining reflective performance

Typical brightness of 750+ candlepower

Industry's highest visibility guidance in wet or dry weather conditions with full reflective strength from distances of 1,000 feet or more

Easy-to-apply tape sticks to a variety of surfaces including fiberglass, aluminum and painted steel (make sure surface is clean, dry and oil free before applying)

Choose from our 5 year or 10 year warranty product

Reflex Reflective Stick-On Reflectors

Our reflectors are designed with highly prismatic lenses secured to a durable transparent resin base. Produced on a clear poly liner, the rolls are easy to work with and the reflectors peel cleanly for application.

Each reflector is marked with the SAE A DOT certification. These reflectors are easy to install and are a cost effective alternative to plastic models. Meets or exceeds SAE J592 A.

Stick-on reflectors mount to any clean surface

Low profile - can't be knocked off like molded reflectors

All reflectors marked with SAE A DOT

Easy application and long term durability

High Intensity Reflective Tape

Super Brite is an excellent choice for marking anything that requires a high level of night time visibility, and a with a long term life cycle. The tape has an excellent entrance angularity and high intensity micro-prismatic surface. An aggressive adhesive system that will adhere to most any clean, dry surface. High Intensity product has a reflective value of over 4 times that of our standard engineer grade products. Intended for application on relatively flat surfaces only.

Neonbrite fluorescent reflective is the newest high visibility product from INCOM. This product not only offers the highest levels of night time reflectivity, it is coupled with an extremely fluorescent lime color that stands out in day time applications as well. The tape has an aggressive adhesive backing with 10 year durability. Product meets or exceeds ASTM D-4956 Type VIII.

SOLAS Reflective Tape

Our IMO/SOLAS (Safety Of Life At Sea) compliant microprismatic technology offers excellent long range visibility (over 1 kilometer), typically more than 3 times that of the IMO standard. These tapes are designed to enhance the visibility of life jackets, ring buoys, survival suits, and inflatable life rafts in marine and land environments. It is also very popular for motorcycles, bikes and other common uses due to its extreme reflectivity.

The tape is made from a pliable, thin single layer product, coupled with an aggressive adhesive backing and removable liner. This product complies with SOLAS/IMO requirements approved by the US Coast Guard, European BV and many other countries. Certified to Type 1 and Type 2 applications, and ATON (Aids To Navigation). Meets U.S. Coast Guard Specification G-SEC-393A for use on Maritime Aids to Navigation.

Our standard product is an adhesive backed tape product, we also offer a sew-on textile backed product as special order.
