## Superbrite Retroreflective Sheeting (HRT Series)

Issue Date: NOV 2023

### OVERVIEW

Our high intensity reflective sheeting is a high quality, durable micro-prismatic retroreflective material. Its unique prismatic construction provides an extra high level of reflectivity for demanding traffic control situations. Exceeds applicable requirements for very high intensity grade sheeting applications for Types III and IV retroreflective sheeting set forth in ASTM D 4956.

Hazard striped version of this product may experience fading of the striped print, this will not affect the reflectivity of the product, but would change the appearance. For vehicle applications we recommend our conspicuity tape products.
